PROFESSIONAL SUMMARY

Software Engineer with strong backend development expertise and problem-solving skills (600+ DSA problems). Experienced in building scalable REST APIs, authentication systems, and full-stack applications using the MERN stack. Hands-on experience in optimizing backend performance, improving system reliability, and handling high-volume requests. Currently expanding into AI/ML systems, including LLM workflows, data pipelines, model evaluation (MAE, RMSE), and predictive analytics. Passionate about building scalable, data-driven applications at the intersection of backend engineering and intelligent systems.

EDUCATION

Bachelor of Technology, Information Technology <i>Bharati Vidyapeeth's College of Engineering, GGSIPU, New Delhi</i>	8.76/10 CGPA Nov 2022 – (Expected) June 2026
--	---

EXPERIENCE

Mednex Research Solution Software Development Engineer Intern, Remote • Engineered 10+ scalable REST APIs, improving data processing efficiency by 25% and reducing latency • Designed RESTful services handling 5K+ requests/day , improving throughput by 30% , optimizing API performance and database query efficiency • Collaborated with frontend team to integrate APIs, reducing response errors by 20% • Tech Stack: Node.js, Express.js, MongoDB, React	Dec 2025 – Present
Parihar India Software Developer Intern, Remote • Implemented secure authentication and role-based access control using JWT and MongoDB • Improved login/signup success rate by 30% by optimizing workflows • Developed 8+ scalable backend APIs, handling 3K+ daily requests with improved reliability • Tech Stack: MongoDB, Express.js, React.js, Node.js, Tailwind CSS	Feb 2025 – July 2025
Globe Capital Market Limited Software Developer Intern, Delhi • Identified and resolved 15+ critical edge cases using DSA concepts, reducing runtime errors and improving system reliability by reducing failure rate by 25% • Enhanced application robustness by preventing potential runtime failures • Tech Stack: C++, SQL	July 2024 – Aug 2024

TECHNICAL SKILLS

Programming Languages: C++, Python
Frontend Development: React.js, JavaScript, TailwindCSS, HTML5, CSS3, Bootstrap 5
Backend Development: Node.js, Express.js, RESTful APIs, Microservices Architecture
Databases: MySQL, MongoDB
Developer Tools: Git, GitHub, Postman, VS Code
Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS, OS

PROJECTS

OurSpace - Couple Relationship Tracker Website Github Live Link <i>MERN, JWT Auth, Axios, Context API</i> • Built a full-stack MERN application used for habit & mood tracking with real-time updates for 50+ users • Designed secure authentication using JWT and Context API • Improved user engagement with interactive features and real-time updates
Fee Flow Github Live Link <i>React.js, Node.js, Express.js, MongoDB, RESTful APIs, TailwindCSS, Twilio API</i> • Managed 100+ student records with real-time payment tracking • Automated 300+ notifications via Email, SMS, and WhatsApp using cron jobs • Built REST APIs and dashboard for tracking payments

ACHIEVEMENTS

- Solved **600+ DSA problems**, strengthening problem-solving and optimization skills across arrays, trees, and graphs
- Won **1st Position** in **Hack2Hustle 2025**, competing with **20k+ participants**.
- Selected for the **Super 30** Program led by Anand Kumar Sir.
- **GSSOC'25** Contributor.
