PROFESSIONAL SUMMARY

Software Engineer with internship experience in backend development using Node.js, Express.js, MongoDB, and REST APIs. Built scalable applications with authentication, payment integration, and performance optimization. Solved 700+ DSA problems and passionate about building reliable backend systems.

EDUCATION

Bachelor of Technology, Information Technology 8.76/10 CGPA

Bharati Vidyapeeth's College of Engineering, GGSIPU, New Delhi 2022 – 2026

EXPERIENCE

Mednex Research Solution | Software Development Engineer Intern, Remote Dec 2025 – March 2026

- Integrated Developed 10+ REST APIs for payments, users, and transactions using Node.js & Express.js
- Integrated Razorpay with webhook-based payment status updates
- Improved transaction reliability through retry logic and error handling
- Worked with frontend team to reduce API integration issues by 20%
- Tech Stack:** Node.js, Express.js, MongoDB, React, Razorpay, Postman

Parihar India | Software Developer Intern, Remote Feb 2025 – July 2025

- Built JWT-based authentication and RBAC system
- Optimized signup/login flow, reducing validation and session errors
- Developed 8+ backend APIs for user and admin modules
- Improved authentication success rate through better error handling and validation
- Tech Stack:** MongoDB, Express.js, React.js, Node.js, Tailwind CSS, Postman

Globe Capital Market Limited | Software Developer Intern, Delhi July 2024 – Aug 2024

- Debugged and optimized C++ modules handling business logic workflows
- Fixed 15+ edge case failures causing runtime issues
- Improved SQL query efficiency and application stability
- Tech Stack:** C++, SQL

TECHNICAL SKILLS

Programming Languages: C++, Python

Frontend Development: React.js, JavaScript, TailwindCSS, HTML5, CSS3, Bootstrap 5

Backend Development: Node.js, Express.js, RESTful APIs, Microservices Architecture

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Postman, VS Code

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, DBMS, OS

Familiar: OpenAI API, Cron Jobs, Webhooks, Razorpay

PROJECTS

OurSpace – AI Powered Relationship Wellness Platform | [Github](#) | [Live Link](#) | *MERN, JWT Auth, Context API, OpenAI API*

- Built MERN platform for couples to track moods, habits, and interactions
- Integrated AI sentiment analysis for mood journaling insights
- Designed recommendation engine for activity and communication suggestions
- Served 50+ users with secure JWT authentication.

Fee Flow | [Github](#) | [Live Link](#) | *React.js, Node.js, Express.js, MongoDB, RESTful APIs, TailwindCSS, Twilio API*

- Built fee management platform managing 50+ student records
- Automated 100+ reminders via Email, SMS, WhatsApp using cron jobs
- Developed admin dashboard and payment tracking APIs payments

ACHIEVEMENTS

- Solved **700+ DSA problems**, strengthening problem-solving and optimization skills across arrays, trees, and graphs
- Won **1st Position** in **Hack2Hustle 2025**, competing with **20k+ participants**.
- Selected for the **Super 30** Program led by Anand Kumar Sir.
